

COMPUTERS FOR AFRICA MISSION STATEMENT

The mission of Computers for Africa is to help reduce social disparities in Africa by focusing on bridging the digital divide.

In support of that mission, our primary goal is to mobilize North America's technological surplus to equip and support organizations that serve Africa's underprivileged.

The specific objectives and purposes of this corporation shall be:

- a) Collect reusable personal computers, peripherals, and software from businesses, individuals, and other low cost sources.
- b) Refurbish computer systems via installing upgrades, loading software, testing, configuring and networking.
- c) Promote North American involvement in international issues by providing hands-on volunteer opportunities.
- d) Ship refurbished computer systems with installation instructions.
- e) Supply educational materials and licensed software that support African curricula and future employment opportunities.
- f) Help establish liaisons between CFA supported centers and local sources of educational, technological, and economic support.
- g) Support knowledge sharing among CFA's clients to help them understand and address critical social issues.
- h) Increase public awareness of the international digital divide.
- i) Engage in any other activities necessary or incidental to our main objectives, purposes, and pursuits.
